# 1. Introduction

**Splicer Data Explorer** is a support application of the fusion splicer. It remote control from PC, splice data management, and online update.

### **1.1.** The fusion splicer Requirements

This application supports S178 series, S153 series and S123 series.

It is necessary for the fusion splicer to install a compliant program when use this application. Check the fusion splicer software version.

If the software version is older th"Figue.1-2", update the fusion splicer by referring "6.1.2."

Figue.1-1: Check the software version

The fusion splicer	Software version
S178 A	A04 (or above)
S153 A	A04 (or above)
S123 C/M4	A05 (or above)
S123 M8/M12	A03 (or above)

# 1.2. PC Requirements

The following minimum configuration is required to run Splicer Data Explorer.

	Fi	gue.1-3: PC Requirements
The	fusion	Software version
splicer		
CPU		INTEL Pentium4® 2.0 GHz class system
MEMORY		256 MB (512 MB recommended)
HDD		50 MB
OS		Windows XP SP3
		Windows Vista SP2
		Windows 7 SP1
		Windows 8
USB Port		USB 2.0
etc		Direct X: 9.0d
		.NET framework: 3.5 SP1
		Microsoft Excel: 2000 (or above)

Refer to the following links for the latest update.

- Direct X End-user Runtime
   <u>http://www.microsoft.com/downloads/en/details.aspx?FamilyID=2da43d38-db71-4c1b-bc6a-9b6652cd92a3</u>
- .NET framework
   <u>http://msdn.microsoft.com/en-us/netframework/cc378097.aspx</u>

### Setting and Start

# 2. Setting and Start

This section describes how to install the Application and USB driver. When you connect the fusion splicer to a PC for the first time, it is necessary to install the driver. There are two kinds of USB modes, and it is necessary to perform installation for each.

### 2.1. Install USB Driver

- 1. Download the USB drivers to your PC.
- 2. Execute downloaded file, the driver files are extracted.
- 3. Execute "dpinst.exe" in "x86 Driver" folder when 32-bit OS, in "x64 Driver" folder when 64-bit OS.
- 4. Click "Next" button. The USB driver will be installed.

### 2.2. Application Install

1. Execute the installation file. Press "**Next**" Button, when installations start.

2. Press "Next" Button. If you change installation directory, Press "Browse" Button and select the directory.

3. Press "Install" Button. If you change start menu name, rewrite name.

### 2.3. Running program

- 1. Connect the fusion splicer and a PC with a USB cable, after power supply of the fusion splicer is turned on.
- 2. To start the Application, click on the icon from desktop or running the "SDE.exe" from installed folder.

It is necessary to install two USB drivers, when you first connect PC and the fusion splicer.

# 2.4. About USB mode

This application uses two USB modes, and each mode is automatically changed by a function. Data-MODE is used when functions except Update are selected. At the time, LCD screen of the fusion splicer is turned off.

USB MODE	LCD display	Function
Normal-MODE	Light ON	Update
Data-MODE	Light OFF	Monitor     Manual Capture Data     Splice Information

Figue.2-4: About USB MODE

# 3. Function -Monitor-

This function performs remote control to the fusion splicer from PC. It is necessary to be changed to Data-MODE. The sub function is as follows.

### 1 Remote Display

Displayed screen from the fusion splicer. The screen is displayed in the whole of software.

#### 2 Remote Panel

Control the fusion splicer from PC.

#### 3 Message Editor

The message is changed directly from PC.

#### 4 Image Capture

A favorite image is saved to PC.

# 3.1. Remote Display (Normal size)

- 1. Push "Start" button.
- 2. If USB mode is not Data-MODE, push "**OK**" after caution is displayed
- 3. A Screen of the fusion splicer is displayed.
- 4. If you want to stop the fusion splicer, push "**Stop**" bottom.

Splice Data Explorer [Version	on 1.2.4]		
Monitor	Manual Capture Data	Splice Information	Update
Ready	01/11 20:38 0000000 000000 000000 TEST SINGLE HODE		
Menu Stop	CURL REMOVE Shortcut		
	Serd		
CAUTION: LCD screen of fusion sp	icer turns off while PC screen is	activated.	

### Figue.3-2: Remote Display

# 3.2. Remote Display (Screen Size Change)

1. Push "**Maximize**" button or change window size. The screen of splicer changes in conjunction with the window size.

2. When "Hide Button" is pushed, the Remote Panel and the Message Editor are hidden.

Figue.3-3: Maximum size display

# 3.3. Remote Panel

- 1. It operates similarly as operating keys of the fusion splicer.
- 2. Refer to a manual of the fusion splicer about the function of keys.

### 3.4. Message Editor

- 1. Move to the message input screen by operating the fusion splicer. (ex: "PREG Edit" → "Fusion" → "004:DS DS" → "Edit Comment")
- 2. Input a message into message box, after an edit target message was selected. Refer to a manual of the fusion splicer about the number of the input character.
- 3. Push "Send" button.
- 4. If editing is completed, you can edit the next message.
- 5. When you finish editing, push "**Escape**" button in the fusion splicer. And select "Over Write" or "Cancel".

It cannot send the character which does not support. Use the character displayed by a screen of the fusion splicer.

# 3.5. Image Capture

- 1. Active "Remote Display" in reference to "3.1.".
- 2. Display the screen which you want to store, and click "Left-click" button in the space of the right side.
- 3. The image stored temporarily is displayed.
- 4. When you choose the image and click "Right-click", a menu is displayed.
- 5. When you save PC the image, select "**Save As...**" from a menu.

# 4. Function -Manual Capture Data-

This function can refer to the Manual Capture Data stored in the fusion splicer. It is displayed with "Image Data" in the fusion splicer. Refer to a manual of the fusion splicer about how to use Image Capture. It is necessary to be changed to Data-MODE.

## 4.1. Get Manual Capture Data

- 1. Push "Manual Capture Data" button.
- 2. If images are stored in the fusion splicer, push "**Yes**" button after the message is displayed.

### 4.2. The view of a function

The stored images can be confirmed. The view of the screen is as follows.

### 1 The list of data

It displays the list of saved data. The maximum saving number is 24.

### 2 Detailed data

Details of the selected data are displayed.

### Figue.4-2: Manual Capture Data

#### 3 Images

The image of the saved data is displayed. The stored image becomes either one of X or Y.

### 4 Save As...

The selected data is saved in PC.

# 5. Function -Splicer Information-

This function can refer to the Splice Information stored in the fusion splicer. "Splice Information" is automatically saved when fusion splice succeeded. It is necessary to be changed to Data-MODE.

### 5.1. Get Splicer Information

- 1. Push "Splice Information" button.
- 2. If images are stored in the fusion splicer, push "**Yes**" button after the message is displayed.

### 5.2. The view of a function (List)

Figue.5-1: message

(i)	Splice Information is stored in Fusion	Splice
4	Refer to the data?	
	Yes No	

The stored images can be confirmed. The view of the screen is as follows.

### 1) The list of data

It displays the list of saved data. The number of the data which it can save is different by a model of the fusion splicer.

### 2 Detail

Details of the selected data are displayed. Refer to "5.3.".

### 3 Save As...

The list of data is saved in PC.

### Function -Update-

# 6. Function -Update-

This function can update the fusion splicer and this application. The update file gets from the internet. It is necessary to be changed to Normal-MODE.

#### 1 Update Fusion Splicer

It updates software of the fusion splicer.

#### 2 Update Splicer Data Explorer

It updates software of this application.

#### **③** Current Software Version in Fusion Splicer

A version of connected the fusion splicer is displayed.

### (4) Software information from Internet

The version that you can download is displayed by the Internet.

### 5 Start

It starts installation.

#### 6 Status

The update situation is displayed.

#### 7 Install

A progress meter is displayed during update.

Bolice Data Explorer [Version 1.0.0]	
Monitor Manual Capture Data	Splice Information Update
1 Update Fusion Splicer Update Splicer Data Explorer

CAUTION: LCD screen of fusion splicer turns off while PC screen is activate	ed.

Figue.6-1: Update

### 6.1. Software Update

The fusion splicer is updated by the following flows.

Figue.6-2: flowchart of Update Fusion Splicer

Fusion programs and heater programs are returned to default when it update of the fusion splicer.

### 6.1.1. Update from supported software version

- 1. Push "Update Fusion Splicer" button.
- 2. Input the serial number into the message box.

If you confirm the serial number, check the bottom case or the setting of the fusion splicer.

- 3. If your PC is connected with the Internet, a version of software is displayed.
- 4. Push "Start" button, after select a software version from list.
- 5. It automatic starts update after download ends.
- 6. The cautions during update are displayed. Push "Yes" button when you confirm cautions.
- 7. When the update starts, it is displayed in Status as "Sending..."
- 8. When update succeeds, a message is displayed. And the fusion splicer automatically reboots after push "**OK**" button.

If it was disconnected communication during update, the fusion splicer might suffer serious damage.

## 6.1.2. Update from unsupported software version

- 1. Start the application after a USB cable pull out. And select "Update".
- 2. Push "Update Fusion Splicer" button, after connecting a PC and the fusion splicer with a USB cable.
- 3. Input the serial number into the message box. If you confirm the serial number, check the bottom case or the setting of the fusion splicer.
- 4. When update succeeds, a message is displayed. And reboot the fusion splicer manual operation after push "**OK**" button.

The serial number is a figure of five digits.
 Serial number is "09999". → Input "09999"
 Serial number is "9999". → Input "09999"

### 6.2. Application Update

- 1. Push "Update Splicer Data Explorer" button.
- 2. It automatic starts installer after download ends. Exit the application, after start installer.

This function needs to connect an internet to download a setup file.

# 7. Troubleshooting

Problem	PC doesn't recognize the fusion splicer.
	Check a COM port number.
Answer	1. The port of COM16 or more cannot be recognized in Splicer Data Explorer.
	2. Run a device manager to change a USB port number.
	http://technet.microsoft.com/en-us/library/cc754755%28WS.10%29.aspx

Problem	An error is displayed when operate "Remote Display".					
	Change setting of the PC display.					
	<ol> <li>Open a setting page.</li> <li>("Control panel → Appearance and Themes → Display →Settings → Advanced → Troubleshoot")</li> </ol>					
	2. Move the "Hardware acceleration secondary" from the left.					
Answer	3. Remove the check from "Enable write combining".          Image: Catalyst(TM) Control Center       Image: Control Center         Image: Catalyst(TM) Control Center       Image: Center         Image: Catalyst(TM) Control Center       Image: Center         Image: Catalyst(TM) Control Center       Image: Center </td					

Problem	The application doesn't respond.
Answer	Reconnect a USB cable after pull out from PC. If the error pop up is displayed, reconnect a USB cable after select "Continue"
	button.

Problem	It was connected to the Internet, but cannot acquire file information.
	Check a setting of firewall on your PC.
Answer	<ul> <li>Splicer Data Explorer cannot connect with the Internet depending on PC environment of the use it may become the security setting.</li> </ul>
	<ul> <li>Check Splicer Data Explorer is set by the setting of the fire wall by "permission".</li> </ul>
