

# UniFi SmartPower Professional Power Distribution System

The UniFi SmartPower PDU Pro offers Sixteen power control outlets, supporting up to 1875W of 125V AC power consumption. In addition, the UniFi SmartPower PDU Pro has four USB type C ports for additional power sources.

The UniFi SmartPower PDU Pro is a device installed between the AC outlet and the power plug of an internet modem or router, and is compatible with all types of Internet modems with US AC plug, including cable modems, DSL routers and optical network terminals. The UniFi Network Controller continuously monitors availability of an internet connection. If the connection drops, the UniFi SmartPower PDU Pro automatically restarts the modem or router by disconnecting power for a short period of time.\*
