

Parabolic antenna JRME-900-6 MIMO

Dual-polarized (with connectors) parabolic antenna **JRME-900-6 MIMO** is designed for links with MIMO mode at the 6 GHz frequency band. Superior performance with deep reflector dish and **added collar** complies with standard ETSI class 3 and US FCC cat B2.

Electrical parameters:

Frequency range	5.9 – 7.125 GHz
Gain	33.0 ± 1 dBi
Front to back ratio	≥ 60 dB
Beamwidth_{-3 dB}	3.1°
VSWR	< 1.4
Polarization	Linear, vertical/horizontal or 45°
Electrical Compliance	Class 3 ETSI EN 302-217-4-2 v1.5.1 Cat B2 US FCC
Isolation between connectors	≥ 35 dB
Type of connectors	R-SMA or N

Mechanical parameters:

Parabola	Ø 900 mm , aluminium alloy
Radome	UV steady plastic ABS
Installation for mast	Ø 40 – 120 mm
Operating wind load	140 km/h (87 mph)
Survival wind load	210 km/h (130 mph)
Weight of antenna of holder	11.1 kg (25.4 lbs.) 3.2 kg (7.1 lbs.)

Parabolic antenna JRME-900-6 MIMO

Usage:

- deep parabola and added collar for better electrical parameters
- **easy to assembly:** first the holder and then the antenna only by 2 screws
- **fine setting** elevation (of gradient) $\pm 20^\circ$ and azimuth $\pm 16^\circ$
- **fine setting** polarization $\pm 5^\circ$
- extreme wind stability

The antenna is supplied together with a holder that allows easy mounting on a mast. Holder can be installed separately on the mast. Subsequently, you can simply hang up the antenna with microwave unit into it. The holder allows precise adjustment in both directions. Ready for right and left side mounting.

In the areas with the expected occurrence of the strong winds mounting on the mast with minimal \varnothing 70 mm is recommended.
